SOC Detection Lab: Detection Log

Lab IPs

Machine	IP address
Wazuh server	192.168.56.107
Endpoint	192.168.56.108
Kali	192.168.56.109

Results

#	Scenario	Attack time	Detected?	Rule ID	Rule description	Level	ATT&CK	Verdict
1	SSH brute force	21:38 2026-10-08	Yes	5760	sshd: authentication failed.	5	T1110	True Positive
2	Port scan	21:46 2026-10-08	No				T1046	Missed Detection
3	New account	21:55 2026-10-08	Yes	5902	New user added to the system.	8	T1136.001	True Positive
4	File integrity	20:37:33 2026-10-04	Yes	550	Integrity Checksum Changed	7	T1565.001	True Positive
5	Sudo use	20:43 2026-10-04	Yes	5402	Successful sudo to ROOT executed.	3	T1548.003	True Positive

Notes

Port Scan was not detected. Port scan activity was not detected because Wazuh's host-based agent monitors logs and file activity on the endpoint itself, not raw network traffic reaching it. A network scan like this one leaves no trace in those logs, so closing this gap would require a network-level tool such as Suricata running alongside the agent.
